About Gokul Water Technologies

With an objective to become one of the reputable names in the water and wastewater treatment industry, we, **Gokul Water Technologies** began our journey in the year 2021. We are striving continuously to establish its presence in several cities in India, securing numerous happy customers with our value-added products and up-to-the-par services. We deal in sewage treatment plants, reverse osmosis plants, filter cartridges, industrial alums, water treatment spare parts, industrial water chillers, water treatment chemicals, FRP counter flow cooling towers, filter press machines, water softening plants, FRP water softeners, etc. Besides the aforesaid products, we are specialists in STP plant fabrication.

The products offered at Gokul Water Technologies are high in demand because of their excellent quality, efficient performance, long service life, and competitive prices. We also ensure timely deliveries of their ordered products to the clients places. In the production process of our products, we ensure that only top-grade components and the best techniques are used. Our STP plant fabrication services are rendered under the observation of highly trained and experienced professionals. We also deal in customized options of the offered products and services which are provided as per the customers specifications.

We have a state-of-the-art infrastructure that is furnished with technologically advanced machinery. This enables us to produce products in larger volumes and meet the increasing demands of our customers on time. Each and every operation in our business is carefully handled by a team of professionals. Working in close coordination with each other, our team members maintain an organized and welcoming environment at work and avoid any kind of carelessness in the entire process.
