About HPM Generator

HPM Generator is a reputed and reluctant manufacturer and supplier of a wide range of generators. Based in Dehradun, we are providing portable welding generators that are used for generating power. We are designing an excellent portable generator with the help of our expert professionals. We are manufacturing portable generators that are required for various industries.

We are offering customized generators at market-effective rates. We are renowned for providing complete solutions for generating power for various industries.

Product Assurance

Our products are easy to maintain and easy to transport. We are dealing in generators like petrol generators, welding generators, LPG Generator, etc. We are developing different types of generators in different sizes and prices. We are using outstanding quality raw materials for manufacturing these types of generators.

Our products require less maintenance and increase the productivity of the organization. Due to lower downtime, these generators are in high demand in various industries.

Why Us?

We have experience of more than a decade and are offering magnificent quality products to the customers. Founded in 2011, we are known for quality generators with excellent durability and affordability. Our products are widely used in construction, fabrication, and other projects for providing excellent welding power. Our products are considered an excellent source of backup power.
