About SMB Environmental Projects (P) Ltd.

We are a professional project consultancy group, having more than 40 years of practical industry experience. We are engaged in preparation of most practical project proposals leading to overall consultancy, exclusively as per the requirement of a industrialist / entrepreneur. After confirmation of order, we send a detailed questionnaire so that a design / specifications of plant, machinery and equipment etc are properly firmed up for realistic cost estimate. On this basis, and as per the answers for location information received from a client, financial aspects like realistic cost estimate, techno-economic feasibility, project viability, profitability and cash flow analysis is worked out. Further, as we develop a project report exclusively for any client, the information is kept completely confidential and is not shared with any other entrepreneur / industrial group. Every project starts from a “concept” and ends with “commissioning” . There are 5 stages. in any project implementation as follows: 5 STAGES IN PROJECT IMPLEMENTATION 1. Preparation of techno-economic feasibility study / Project Report / Schedule 2. Assistance in Acquisition of land, power and procurement of licenses / NOCs etc. 3.Ordering Plant and Machineries & finalizing various contracts 4. Inspection and Dispatch of Plant & Machinery 5. Erection Commissioning & Trial Production. We assist in all these activities and hand over to you a complete successful project so that you can run the plant in safe and sound manner.
