About V. K. Pack Well Private Limited

Are you searching for a good irrigation system worker to put in a system that waters the plants automatically. Set up in 1989, VK Pack Well Pvt. Ltd. has become India's driving producer and provider of high-quality irrigation gear. Over the past three decades, we have flooded thousands of hectares.

Our Business

We are producers of trickle and sprinkler irrigation hardware and water-conveying frameworks. All VK Pack Well Pvt. Ltd. components are made from virgin polymers. Each element is subjected to broad quality control tests before supply to guarantee trouble-free operation year after year. Further, each system is outlined to suit a person's necessities after considering trim, crop geometry, soil type, water (quality and amount) and climatic conditions.

Our Approach

Water is considered the foremost valuable asset, and it is getting to be amazingly rare. This gets to be articulated in draught-prone regions. In this manner, brilliant water management solutions have become the need of the hour. This is often where VK Pack Well Pvt. Ltd. stands with you. We offer coordinated irrigations and water management solutions with customised frameworks after examining the water assets and regions to be flooded.

We have an impactful nearness in satisfying each requirement for savvy water management. From extricating underground water for cultivating and drinking to arranging sewage water, we have earned acknowledgement for our world-class innovation and faultless generation forms.
